

Website and Communication 2014

Sheila Hughes and Betsy Hunt

This year the Perennial Planters has continued to take steps to the next level of digital sophistication! We send our monthly planter electronically each month.

Our website, www.perennialplanters.org is live and full of information, some of which needs to be updated. You can find our membership list, meeting information, annual reports, planter archive and a history of the club. If anyone has ideas of things that should be included please let us know. It would be wonderful to include pictures and links to other important organizations. We want the site to be user-friendly and informative to our membership. Please send us your feedback.

With my involvement in the Zone II meeting I spend quite a bit of time on the GCA Website. I would encourage all members to explore this site, there is lots of interesting and useful information available.

We send out ___pages (color) in the fall with meeting and member information. What color are those pages? The password for any password protected pages on the website is that color and pages. All one word!
___pages.
